

Preventative and Predictive Maintenance: We have a series of maintenance related check points that are inspected either daily, weekly, monthly, seasonally or annually to review the overall condition of the property. This allows us to address small repairs before they become large repairs. Our large management portfolio allows us to choose from a large list of skilled and approved contractors always striving to receive the highest quality service at a reasonable price. Our staff is ever mindful that a good preventative and predictive maintenance program saves our clients from unnecessary expenses.

Vacant Space: We understand that the appearance of a vacant space will influence the impression of a prospective tenant. We work closely with the responsible broker to insure the space is ready for showing.
